Self-taught full-stack software engineer with 8+ years of professional experience, especially interested in building distributed systems.

Work Experience

Senior Software Engineer **Jorato (Copenhagen, DK)** **Mar 2020 - Current**

- Led the development of multiple proptech products using: Go, .NET Core, AWS, Postgres and React.
- Sped up search results by 20 times through implementation of a search engine.
- Managed and automated a CI/CD pipeline using tools such as Github Actions, Docker, and AWS ECS to automate the build, test, and deployment process, resulting in faster and more reliable software releases.
- Led initiative to convert infrastructure to code reducing deployment time and ensuring consistent and reproducible deployments across multiple environments.

Software Engineer **Self-Employed (Copenhagen, DK)** **Sep 2018 - Mar 2020**

- Worked for several domestic clients delivering both front-end and back-end applications, primarily using technologies such as .NET Core, React and PHP.

Lead of Research **Huckleberry Games S.A. (Poznań, PL)** **Feb 2018 - Sep 2018**

- Led a team of four along with PwC to make a technical documentation for development of "Advanced NPCs AI" project for games. It resulted in company getting a 1.5M PLN (370K EUR) grant from National Centre for Research and Development.
- Participated in defining roadmap and milestones for the team and to met grant requirements.

Software Engineer **Huckleberry Games S.A. (Poznań, PL)** **Aug 2015 - Feb 2018**

- Participated in development of MMORPG game server using C# and .NET with communication over UDP.
- Architected and implemented an internal tool for designing and building in-game quests for non-technical team.

Projects

Personal Finance iOS App

- Developed an iOS app using React Native and Typescript that enables users to synchronize accounts and transactions from European banks, leveraging Open Banking (PSD2) to ensure secure data exchange and compliance with banking regulations.
- Used Go for developing multiple backend services and tools such as Kubernetes, Github Actions and Terraform to automate the build, deployment processes and manage infrastructure as code.

Technical Skills

Languages Go, C#, JavaScript, TypeScript

Technologies Postgres, AWS, Terraform, AWS ECS, React, .NET Core
